INFORMATION ON THE VERTEX VX-2200V VHF MOBILE RADIO (SEE PICTURE ON "SPECIAL" PAGE)

The **VX-2200** (128-channel) series mobiles are full featured FM transceivers designed for flexible mobile business communications in the VHF Land Mobile Radio band.

These transceivers are designed for reliable business communications in a wide variety of applications with a wide range of operation capability provided by their leading-edge design with high output power (25 Watts VHF). The **VX-2200** mobiles have an eight character alpha-numeric display to manage the 128 channel capacity.

For more information or to arrange for a demo,
please phone Johnny on 0409 447 952 or 3856 6911.

TRANS COMMUNICATION'S WORKSHOP

We are very proud of our Technical Expertise. With almost 63 years combined experience in our workshop, our technicians are professionals who are qualified to repair, maintain and/or service ANY brand of two-way radio equipment. Our installers are also qualified to install any two-way radio or mobile phone into any vehicle, crane or business premises. Our hourly workshop rate is **only** \$75.00 (excluding GST) per hour and we deliver outstanding service to all our customers. If you have not yet made use of our services, please give us a go ... you will not be disappointed.

IDAS CASE STUDY

SOUTH AFRICAN TOWING COMPANY

In South Africa, the host country of the 2010 FIFA World Cup, vehicle towing remains a very competitive industry. The roads in urban areas are very congested in South Africa. From such crowded roads, towing companies skillfully remove stranded and accident damaged vehicles and thereby help to avoid aggravation of traffic congestion. Their prompt performance is highly appreciated by other drivers and the traffic police.

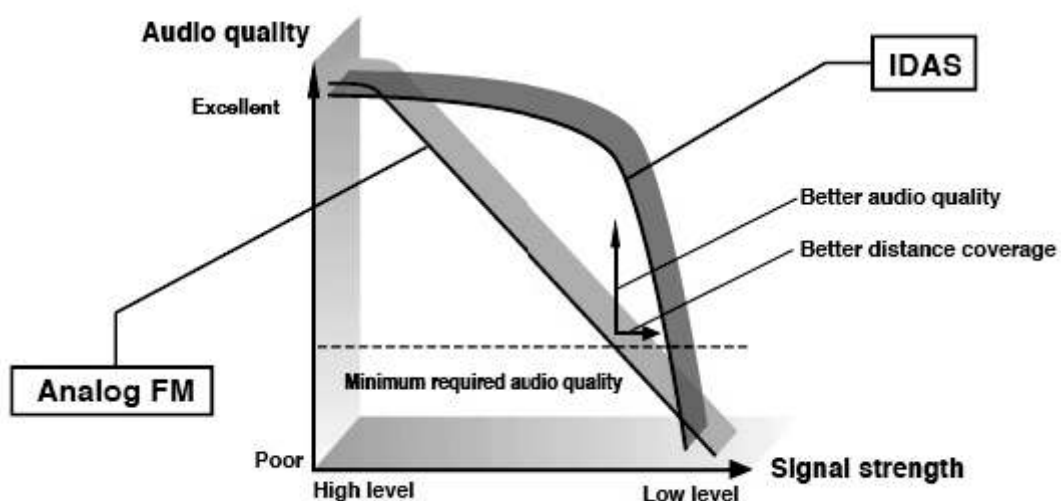

To survive in this competitive industry, reliable and effective communication is critical. Tow truck drivers therefore need to be quickly and effectively given information such as the exact location of stranded vehicles and the fastest route to get there.

The Solution

IDAS! By implementing IDAS, the customers have obtained their own private communications system and they now enjoy more effective and secure communications over their competitors and say that IDAS is the ideal communication system for their business success.

For more information on the IDAS systems, please phone Johnny on 0409 447 952 or 3856 6911.

Analog vs Digital Coverage
