

GX-620

Big Performance from a small package.

The new GME GX620 Handheld Marine VHF Transceiver offers boat owners and marine enthusiasts a substantially lower cost portable option without sacrificing features or compromising on quality.

With most of the features of the larger 25 Watt fixed-mount marine VHF radios, including channel scan, instant Channel 16 access, dual and triple watch the compact 3 Watt GX620 is ideal for dinghies or tenders that need to keep in touch with the “mother ship” or small boats that don’t have electrical systems or sufficient space for a fixed-mount radio.
